

PC Fundamentals with CompTIA Strata

CompTIA Strata is a foundation-level qualification that demonstrates you have a comprehensive knowledge of basic technology and how to use it. It can be used as an essential starting point for a career in IT or to further your computing knowledge for your job or at home.

gtslearning's **PC Fundamentals with CompTIA Strata** covers every exam objective in the CompTIA Strata International syllabus, making it easy for you to learn everything you need to know to pass the **CompTIA Strata Fundamentals of IT Technology** exam.

Free website support

PC Fundamentals with CompTIA Strata also includes free student access to gtslearning's CompTIA Strata support site and exam preparation community. Visit us online at www.strata-learning.com to find out more about what is available - registered users can access two free practice tests for each exam, glossary and extra practical activities.

Content overview

PC Fundamentals with CompTIA Strata

This fully illustrated course covers every exam objective in the CompTIA Strata syllabus, making it easy for to learn everything students need to know to pass the CompTIA Strata Fundamentals of IT Technology exam.

Students will also learn and practice the use of Microsoft Windows Vista and Internet Explorer.

The course has the following learning outcomes:

- Set up and use a computer running Microsoft Windows Vista.
- Identify benefits and risks of upgrading PC components.
- Install, configure, optimize, and troubleshoot Windows.
- Set up a home / office network and connect to the Internet.
- Understand the effect of IT use on the environment and "Green IT" technologies and practices
- Perform preventive maintenance and troubleshoot basic PC hardware operational problems.

This course will prepare students for the FC0-U41 CompTIA Strata Fundamentals of IT Technology exams for the objectives released in September 2009.

Target audience

This course and the Strata exams are designed to help candidates acquire the knowledge and skills to do one or more of the following:

- Set up and use a computer at home securely and keep it in good working order.
- Provide informal support for PCs and simple computer networks to colleagues in a small business.
- Prepare to study for the CompTIA A+ certification in PC support skills or other advanced IT education programs.

Student prerequisites

Some experience with using a keyboard and mouse will be helpful but is not essential.

Course content

The course consists of perfect-bound book containing indexed notes, practicals, and review questions, and a companion website (www.strata-learning.com), containing extra practicals and activities, answers to review questions, a comprehensive glossary and two online practice exams.

The course includes a special section dedicated to helping students find a job in PC support. There's an overview of the industry, advice on where to look for jobs, plus practical help for writing a resume or job application and attending an interview.

The course is designed for self-paced study and blended learning. Instructor resources for the course are available on gtslearning's trainer portal (www.gtstrainer.com), subject to meeting minimum order requirements. gtstrainer hosts setup guides and data, classroom labs, PowerPoint slides, timetables, and extra exam information.
